

What are the benefits to drivers?

- Easier, safer, and faster than to replace a spare tire along a busy or deserted road
- After the repair, driver has more than enough time (300km, 80km/h) to go to a trusted workshop for permanent repair of the tire.
- An important emergency kit for long drives
- Easy and convenient tool to maintain correct tire pressures extending tire life and achieving better fuel consumption.
- Save weight and improve fuel consumption
- Save space for more boot storage.
- No more driving with the ugly spare wheel
- No more worry for car owners who do not have spare wheel because of ICE (Audio-Video) installation or whose cars comes with original runflats.
- No more worry for car owners who upgrade to performance tires and find that the existing spare wheels become too small.

NEVER CHANGE A FLAT TIRE AGAIN

Getting a flat tire on a busy – or deserted – highway is any driver's worst nightmare. But it doesn't have to be.

With AirMan, you can get back on the road in about five minutes.

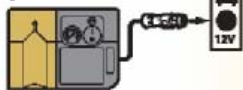

The AirMan Tire Repair System is made up of an integrated air compressor and *Dunlop* tire sealant. The unique *Dunlop* latex sealant is injected into the tire as the 12-volt air compressor completely inflates the tire. Then, when you start driving, the latex is evenly distributed inside the tire, creating an airtight seal, repairing the flat tire instantly.

After you've repaired a tire, just purchase another replacement sealant bottle and your AirMan is ready for use again!

AirMan's Six Easy Steps to fixing a flat tire.

1

Connect the 12V plug into the car's 12V receptacle.

2

Turn up the chamber to reveal the latex nozzle.

3

Connect the air hose to the latex nozzle.

4

Connect the air hose to the tire's valve.

5

Turn the compressor "ON" until the needle stabilizes in the "Red Zone".

6

Drive away immediately.

* Check your tires as soon as possible by a tire professional. Any sidewall punctures can never be repaired.

AIRMAN IN THE HOME

AirMan is the most advanced and useful 12-volt Air Compressor available today.

With AirMan you can inflate your vehicle's tires, bicycle tires, sporting equipment and air mattresses faster than ever before. **Look to AirMan for all your everyday inflation needs.**

AirMan comes with three adaptors: general, sports needle, and a high-volume accelerator for inflatable pool toys and air mattresses. Whether you're in the garage, relaxing in your backyard, or out camping, the ultra-handy AirMan will take care of all your inflatable products.

AirMan takes the work out of inflating your sports equipment. Spend more time playing and less time inflating.

Get your ride off to a smooth start. AirMan's speedy performance delivers time-saving convenience to your everyday tasks. It's just another shortcut to get you on your way.

The AirMan always enjoys a trip to the cottage, or camping. Inflate your raft, life jackets, air mattresses and other outdoor inflatables in no time flat.
